

OLA Daily Performance Analysis Report

Goal Of This Project

- Analyse the performance of OLA company based on revenue, Booking, Rating

Dataset

For this I have used the OLA dataset and cleaned the whole data.

Following were the some errors in dataset :

- In the dataset, date and time were in one column. So, I created a new date column. Then, splitted both date and time and populated the date part in the new date column and deleted the pre existing date column.
- Deleted duplicate rows.
- Deleted blank columns.
